MXnet 1G Heavy Duty Rack
AC-MXNET-1G-R15

The AC-MXNET-1G-R15 is a 6-RU tall, heavy-duty rack accessory designed to vertically organize up to 15 MXnet 1G Ecosystem encoders, decoders, and the AC-MXNET-1G-CBOX-B for optimal ventilation. This rack has all the necessary mounting hardware and includes two blank plates, with additional blanks sold separately. Numbered slots enable easy identification in large installations. A hook-and-loop metal clasp attaches to each MXnet 1G chassis, securing the device to the bottom of the AC-MXNET-1G-R15. A thumbscrew safely secures the top, allowing for rapid removal when needed. The AC-MXNET-1G-R15 positions most MXnet 1G units for a clean, uncluttered, front-facing display and provides detailed wire management and thermal dissipation on the backside, making it an indispensable accessory.

FEATURES

- **Efficient Space Utilization:** Fits up to 15 MXnet 1G units in a 6U space
- **Complete Mounting Hardware:** Includes all necessary mounting hardware
- **Clean and Organized Setup:** Comes with 2 blank filler plates; additional blanks sold separately
- **Robust Construction:** Provides superior durability and reliability

Note: The AC-MXNET-1G-DANTE-E is a "taller" unit when positioned vertically than its MXnet 1G siblings and does not fit into the AC-MXNET-1G-R15. Please continue using the AC-EZRACK-15 for AC-MXNET-1G-DANTE-E encoders to ensure proper thermal dissipation.
