Product Overview

The DSi 2.0 amplifier family, JBL's first line of dedicated cinema amplifiers, builds on Crown DSI Digital Screen Array amplifier technology, integrating best-in-class DSP from Crown's flagship CDi DriveCore series to deliver potent, cost-effective amplification for JBL's entire range of cinema loudspeakers. Choose from two power configurations, available in analog-plus-digital "D" versions featuring Dante/AES67 connectivity.

Models supply 4 channels of amplification with bridgeable outputs in a single 2RU footprint, and can power up to four JBL surround speakers with a single amp channel in high-power-density 2Ω mode. All DSi 2.0 series amps incorporate best-in-class, 32-bit/96kHz floating-point DSP and Crown DriveCore technology, which replaces hundreds of internal components with a single processing chip for superior power density, stability and audio fidelity.

Top Features

•   DriveCore 4-ch high-power platform | bridgeable to 2-ch operation

•   2-ohm stability allows up to four loudspeakers to be powered by a single channel

•   Advanced high-resolution 32-bit/96kHz floating-point DSP

•   DANTE/AES67 networking and analog audio inputs

•   Front-panel user-interface for easy system configuration

•   Ultra-Quiet fan cooling (51dBA max) | Units can be flat-stacked in a rack installation
