

# DSW.2 DIGITAL ACTIVE SUBWOOFER ROOM-FILLING PERFORMANCE

The DSW.2 Digital Active Subwoofer can integrate seamlessly into many installations that include Meridian loudspeakers. Whether used on its own or in multiples, it delivers deep, room-filling bass with control and accuracy.

A new long-throw, 12" drive-unit with a massive motor system, paired with a highly-efficient, Class-D amplifier, means that the DSW.2 is capable of delivering high levels of sound pressure with precision. Its unique and extremely strong cabinet has been specifically tailored to the drive-unit to eliminate vibrations and allow the loudspeaker to reproduce music accurately at high power levels.

These features, combined with its elegant form-factor and Meridian's suite of on-board technologies, make the DSW.2 the perfect subwoofer in any Meridian system.
