

WALL MOUNT RACK SYSTEM

Fully Assembled - Welded Construction

Our all-in-one, fully assembled Strong® Rack System is welded together for extra strength. With an installer-friendly swing kit, as well as locking latches on the swing kit, front door and side panels, this system keeps equipment secure.

All-In-One Solution

Fully assembled with a swing kit, vented top and base, a tempered, reversible door, and removable side panels, this rugged solution keeps equipment secure on the wall.

Installer-Friendly Swing Kit

Outfitted with steel conical hinge pins for extra guidance and durability, this reversible swing kit prevents sag and locks into place every time. Plus, universal hinges support a swing in both directions.

Easily Accessible Knock Outs

Wire management knock outs on this rack system are screw-on instead of punch-out for added safety & install convenience. No more worrying about sharp, unfinished edges.

Locking Latches

Tamper-resistant locking latches on the swing kit, side panels, and front door ensure equipment is securely locked away. When it's time to access the gear, the door and side panels remove quickly and easily.
