## Sage Series L100i/m Line Source

### In-wall/On-wall

The L100i (in-wall) and L100m (on-wall) Sage Series models feature the same line source planar magnetic technology found in the Sage Series L75 and L150, but measuring a more compact 50 inches in height. They can be completely hidden behind a wide array of acoustically transparent screens, including the popular 2.35:1 aspect ratio screens of suitable width. The L100 incorporates a 50-inch tall planar magnetic line source for mid and high frequencies, accompanied by a woofer array containing eight proprietary high operating pressure woofers. Each channel is a two-cabinet system designed to be installed in-wall or on-wall, adjacent to each other, within four or five inches of each other (flanking a stud in in-wall installations). As with most Sage Series products the use of an SC-2 or SC-3 is required for the necessary DSP and outboard electronic crossovers.

### Specifications:

- Frequency Response = 40Hz – 20 kHz +/-2dB
- Sensitivity = 95 dB/1w/1m
- Planar Impedance = 4.5 ohms
- Woofer Column Impedance = 4 ohms
- Power Handling, peak = >1000W
- Amplifier Channels Required = 3
- Dimensions = See Drawing PDF or DWG File
